

Millersville School's Mission and Vision

Mission: Millersville Elementary is committed to building a strong foundation by educating the whole child to ensure high levels of learning for all.

Vision: To achieve our mission at Millersville Elementary, we are committed to functioning as a Professional Learning Community. We envision a school where all staff:

- Has a personal commitment to educating the whole child: academically, emotionally, physically, and socially
- Use data to frequently monitor student progress and use that data to guide our instruction
- Work together in collaborative teams both vertically and horizontally
- Involve all stakeholders to achieve smart goal growth.

Collective Commitments:

- We will seek help when needed. We will support each other through challenges and celebrate successes.
- We will collaborate often, with student growth in mind.
- We will collaborate both vertically and with our Gordonville grade level colleagues.
- We will analyze student performance data to make adjustments to our lessons.
- We will implement, with fidelity, district/state curriculum with district provided, researched based materials. We will pay attention to students' individual needs (remediation and enrichment).
- We will monitor, use, and share data in a timely and effective way. Data will be used to drive our instruction, interventions, and

extensions. We will reflect on data to check student progress and follow up with actionable steps.

- We will meet every student where he/she is academically, emotionally, physically, and socially.
- We believe that all students can reach high levels of learning.
- We have a shared responsibility in ensuring the success of each student academically and behaviorally.
